

As of January 23, 2020.

Attention ! !

**On Viral Pneumonia
Originated from New Coronavirus from China**

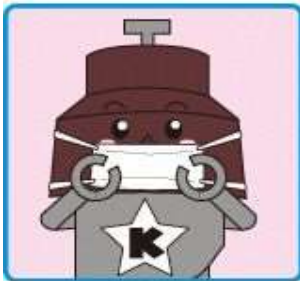

If you arrived from Wuhan City, Hubei Province, China, in the last 2 weeks and currently have the following symptoms, please contact the Public Health Center.

Have a fever (above 37.5 degrees) and respiratory complaints (coughing, phlegm, shortness of breath, panting, etc.) .

Have symptoms above, also fit either of the following ① or ②.

- ① Have been to Wuhan in the last 2 weeks.
- ② Have been in close contact with someone who has been to Wuhan in the last 2 weeks and has high temperature and respiratory complaints.

Prior to consultation, be sure to contact the Public Health Center or medical institutions first. It is critical to prevent further contagion. We appreciate your cooperation.
